DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Imuta et al. US 2002/0156207.

3. This document is directed to polar group containing polymers. These are described as being treated with functional groups falling within the scope of those claimed, [0480]. The incorporation of the claimed nonofiller is suggested at [0525+]. One of ordinary skill would be motivated to combine the claimed nonofiller with the functionalized polymer given the suggestion within this disclosure to do so. As such, the claims are considered prima facie obvious.
